2010 Mourvedre

Grown by Andy and Lauren Timmons in Brownfield, Texas this five acre block's first harvest was 2010. This was the last harvest of the year October 16. With extended hang time some very nice flavors developed on this young wine. William Chris Vineyards currently locked in another 3 acres of Mourvedre down the road bringing this variatel as a mainstay of William Chris production. Up front this wine presents a rhubarb and cherry blossom nose, followed by baked cranberry, clove and white pepper and a silky citrus finish. Drink this wine now and look for it to peak in the next 2-4 years. Remember this is unfiltered wine so some sediment might drop out over time. We recommend decanting and serving about 64 degrees.
